SUBJECT: ON-SITE STABILIZATION OF RADIOACTIVE WASTES

Ms. Robin Sweeney  
U.S. Department of Energy  
Office of National Transportation  
Office of Civilian Radioactive Waste Management  
1551 Hillshire Drive, M/S 011  
Las Vegas, NV 89134

Dear Ms. Robin Sweeney,

It is highly interesting to me to be informed about the progress that is being made to dump radioactive wastes in Nevada.

I head up a research and development laboratory where we have demonstrated our ability for the on-site, stabilization of high-level, radioactive liquid wastes. We are also 99% convinced that we can develop the technology to do the same for the spent fuel pellets from nuclear power plants.

We have been approved for a \$40 million grant for a full-scale (truck-trailer type) demonstration equipment for the proper on-site handling of radioactive liquids.

If this information is of any interest to anyone in DOE, we would be pleased to send you a copy of the Journal of New Energy in which one of our papers has been published showing a large reduction in radioactivity.

Best Personal Regards,

Hal Fox, President
